Right Angle Bracket with Cisco 9178 Interchangeable Door

By Ventev
Catalog # VEN-ID-HWM-9178

Ventev's Right Angle Bracket with Interchangeable Door for the Cisco 9178 Access Point is designed to provide optimal Wi-Fi coverage in high-ceiling structures and provides protection from tampering without RF interference. The bracket can be mounted to vertical walls while keeping the AccessPoint in the Horizontal Plane, making it ideal for Enterprise, Healthcare, Education, and many other verticals. This lightweight enclosure is easy to deploy and ensures safe and reliable installation. It includes an Interchangeable Door that helps simplify migration to new access points without having to change the base. Minimal components allow for quick and easy installation. Included with this enclosure is a key lock for additional security.

Features

- Constructed of lightweight aluminum
- Includes key lock for added security
- Toolless operation to install AP into door and door into enclosure
- Interchangeable door can reduce labor costs associated with future upgrades

Application

Healthcare, Education, Enterprise, and Hospitality
