FEATURES AND BENEFITS

- Installs AP and antenna together, making it an ideal choice for difficult locations, such as I-beams
- Eliminates long coaxial cable runs between AP and external antenna
- The I-beam clamp enables fast, simple attachment to overhead I-beams.
- The antenna mounting tray articulates +/- 55 degrees for precise beam positioning
- Places the access point and antenna inches apart to reduce signal attenuation, significantly improving network performance.
- AP and the cables are concealed behind the antenna for a more aesthetically pleasing appearance.
