

Ventev’s Outdoor Wireless Bollard enables seamless Wi-Fi and wireless communications in any outdoor environment such as in courtyards, along walkways, and across campuses. Constructed of durable, UV resistant fiberglass and polycarbonate, the bollard is designed to meet NEMA 3R specifications and protect and secure most Wi-Fi access points, antennas, switches, media converters, and power supplies from harsh weather and tampering. Includes built in cable management

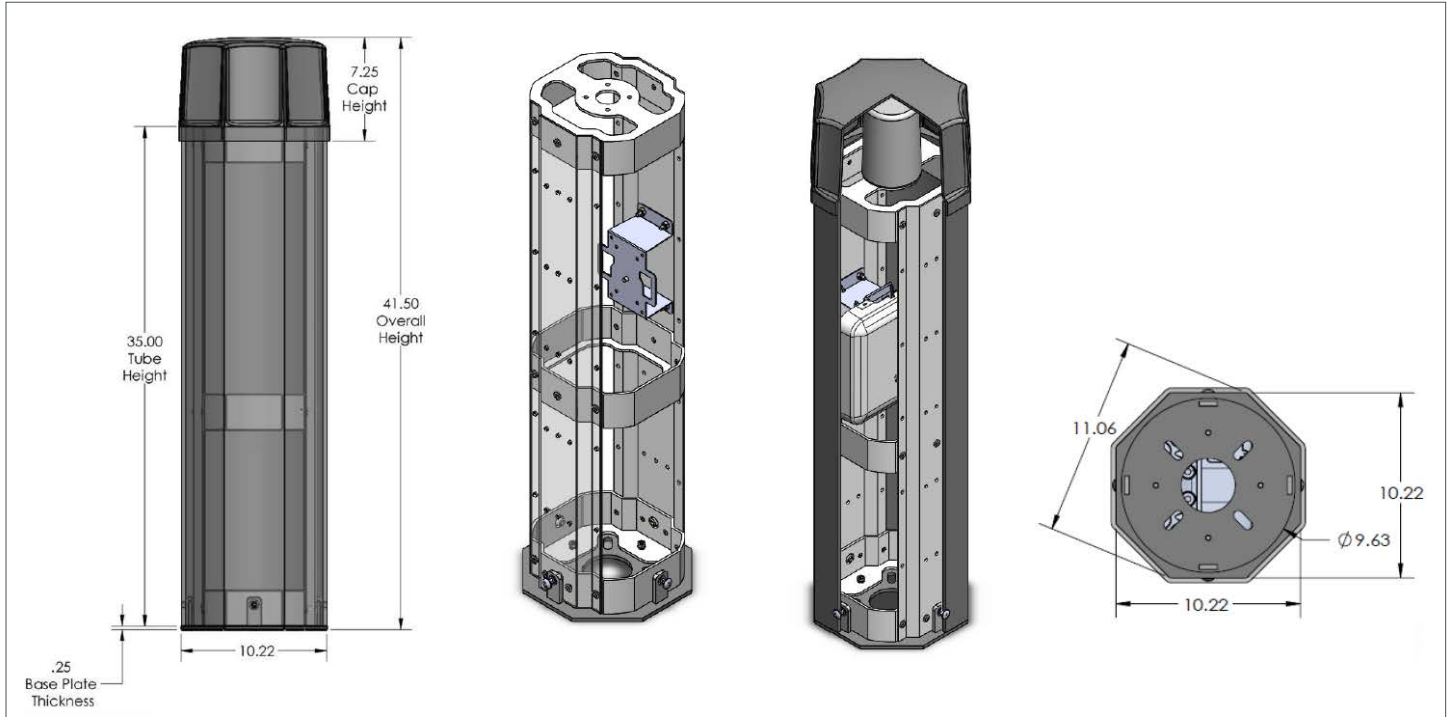

Specifications

SKU	212287
Manufacturer Part Number	BLRD-FRPB-4210C1
Application	Outdoor
Exterior Dimensions	42 x 11.6 x 11.6 in.
Interior Dimensions	9.63 in. diameter, 35 in. length
Weight	36 lbs.
Exterior Material	UV resistant, RF transparent fiberglass with polycarbonate cap. Product color is black and is paintable, using non-metallic paint.
Interior Material	Reinforced and high impact polycarbonate structure that is virtually RF transparent and heavy gage 5052 aluminum anchor base.
Mounting	Anchors to pre-installed concrete pedestal using tamperproof hardware. Cabling routes through conduit in pedestal.
NEMA Rating	NEMA 3R
