

## TerraWave Solutions® Above Ceiling Tile Mounting Plate

TerraWave's Above Ceiling Tile Mounting plate is designed to securely mount equipment, such as WLAN access points (APs), up above a ceiling tile grid. This plate is designed for use with APs that do not already include a mounting bracket. Includes 4 self-tapping screws to secure the AP or other WLAN equipment to the plate and two wing nuts to secure the plate to either the TW-AC-BKT or TW-AC-BKT-L. Additionally, this above ceiling tile plate is an excellent method to mount APs being deployed with rubber ducks above a ceiling tile for a virtually hidden WLAN. Each mounting plate is covered by the Company's two-year TerraNet warranty program. For additional information, visit [www.terrawave.com](http://www.terrawave.com).

### Mounting Plate Features & Specifications:

- TerraWave Model: TW-AC-PLATE
- Dimensions (L x W) 9.0625" x 5.875"
- Includes integrated bolts with fly nuts to secure equipment to mounting bar
- Includes 4 self-tapping screws
- Weight: 0.5 lbs
