

2.5 dBi Rubber Duck Antenna

The TerraWave 2.5 dBi Rubber Duck Antenna is designed for indoor wireless networks operating in any cellular frequency range: 850, 1800 and 1900 MHz. This antenna is ideal for both voice and data wireless application systems. It is equipped with an RPSMA connector and swirl joint for flexible positioning. All TerraWave antennas are covered by the company's two-year TerraNet warranty program. For questions, to request samples or to purchase a product contact a regional sales executive at 800-851-4965 or sales@terra-wave.com. Visit www.terra-wave.com for more information.

Specifications		
Model	M4025025R10020	
Frequency Range	890-960 MHz	1710-1990 MHz
Gain	2.5 dBi	
Polarization	Vertical	
Horizontal Beamwidth	360°	
VSWR	≤2.7	≤3.5
Nominal Impedance	50 Ohm	
Maximum Power Rating	50 W	
Height	8.3"	
Weight	.09 lbs	
Connector Type	RPSMA
