

ventev[®]

PRODUCTS & SOLUTIONS FOR
**Warehouse, Manufacturing, &
Industrial Wireless Networks**

ventevinfra.com \ sales@ventev.com \ 800-851-4965

Ventev offers innovative products and solutions to deploy, protect, power, and connect wireless networks.

“If you design wireless networks, you’ll want to know about Ventev.”

*Network Computing,
Taking Wireless
Infrastructure Outdoors*

“Ventev — a great set of products to help WLAN professionals do their jobs.”

*Keith R. Parsons,
Managing Director Wireless
LAN Professionals, Inc*

CHALLENGE
Extreme Temperatures

From freezer rooms to high-temperature manufacturing, extreme temperatures can impact the reliability of wireless technology.

PoE Powered Enclosure, Heated & Cooled

Keeps ambient temperature of the enclosure within access point manufacturer specified operating temperatures.

PoE Powered Enclosure, Heated
Maintains access point manufacturer specified operating temperature even in extreme climates.

CHALLENGE
Safety & Security

Polycarbonate, NEMA-rated enclosures that offer corrosion and UV resistance as well as impact protection.

Indoor/Outdoor Enclosures
Ideal for indoor and outdoor environments where aesthetics are important, while protecting and securing your valuable equipment.

CHALLENGE
RF-Blocking Environments

Floor-to-ceiling metal racks and machinery block RF signal, reducing the quality of wireless coverage.

Warehouse Antenna

High gain, narrow vertical beamwidths, and wide horizontal beamwidths enable concise coverage of warehouse aisles.

Two Arm Co-Locating Mount

Install the access point and two antennas together and position precisely for high-performance Wi-Fi.

CBRS/LTE Antennas

Ventev's industry-leading antenna engineering now available for CBRS deployments.

Magnetic Forklift Antenna

Mounts on forklifts and jockey units to enable high-performance Wi-Fi.

Raised Access Floor Tiles

Conceal wireless equipment in environments such as mezzanine levels or when traditional mounting locations are unavailable.

CHALLENGE
High Ceilings & I-Beam Installations

Industrial facilities often need to install network equipment on I-beam ceilings that are 30 feet high or higher. Attaching equipment to an I-beam, ensuring adequate RF at user height, and installer safety are common problems.

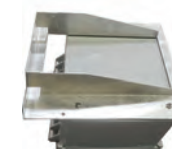

I-Beam Mounts

Easily mount an antenna, access point, or enclosure to an I-beam in either the vertical or horizontal plane.

Right Angle Mounts for Access Points

Mounts the access point in the horizontal position for optimum performance.

Right Angle Mount for Enclosures

Mounts enclosures on a wall or pole at a right angle.

I-Beam Universal Co-Location Mount for Cisco & Aruba Access Points

Mount the latest access points from Cisco and Aruba with antennas to simplify deployments.

CHALLENGE
Extending the Network Outside

Getting power and connectivity to remote parts of a shipyard or storage yard can be expensive and time consuming.

NEMA Enclosures with Integrated Antennas

Save time with factory assembled integrated enclosures for plug-and-play deployments.

UPS Power Systems

Provides reliable PoE+ power for one or two Wi-Fi access points and includes battery backup capability.

Power Extender for Intermittently Powered Light Poles

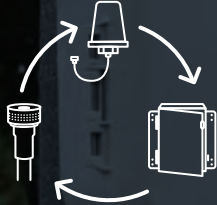

Allows 24/7 operation of wireless equipment deployed on intermittently powered light poles.

Solar Power Systems

Autonomous power system is preassembled for remote outdoor deployment of access points requiring PoE/PoE+ power.

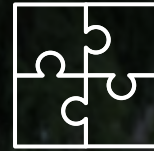

WHY CHOOSE **ventev**[®]

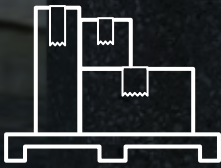

Industry-leading product lines that provide a comprehensive ecosystem of wireless products

Products for every major radio/AP covering Wi-Fi, DAS, CBRS, LTE, SCADA, & two-way

Easy-to-install & Pre-configured, fully integrated solutions

Large inventory of products, ready to ship

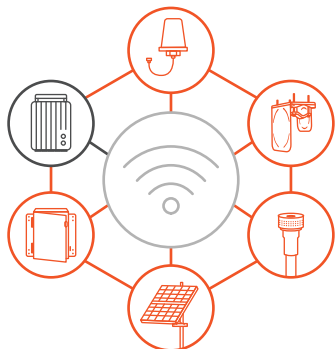

Professional product training & educational materials

Customer support with exceptional product and industry knowledge

After you choose the radio

choose **ventev**[®]
