

Wi-Fi Ceiling Tile Enclosure

with Access Point (AP) Cover for Common Larger APs

Connect, Protect, and Enable™

Ventev's Ceiling Tile Enclosure with Access Point (AP) Cover provides an aesthetically pleasing solution to deploy indoor access points in a suspended grid. The enclosure is compatible with most common large access points and fits both standard or Tegularsuspended ceilings. The Interchangeable Door allows you to replace only the door for future AP upgrades, saving significant time and cost.

Features & Benefits

- Easily fits into any 2 x 2 or 2 x 4 ft. ceiling tile grid.
- Lightweight enclosure reduces strain on ceiling grid to accommodate the increased weight of the AP.
- Interchangeable door simplifies migration to new APs without changing the enclosure base.
- Aesthetic, sleek form factor design blends enclosure and bulkier AP seamlessly within existing ceiling tile grid.
- Minimal components allows for simple installation—no modification of existing ceiling tile grid required.
- Designed to allow the AP to be serviced without removing enclosure from ceiling tile grid.
- Enclosure back box protects against dust and debris to assist in compliance with ICRA requirements.
- Safe to deploy in plenum/air handling installations.
- Includes integrated mounting tabs to assist in securing enclosures to permanent fixture or structure.
- Includes key lock for additional security and cord grip.
