

2.4/5/6 GHz 5/6/6 dBi Directional Wi-Fi Junction Box Antenna

with 8 RPSMA Male Connectors

Ventev's 2.4/5/6 GHz 5/6/6 dBi Directional Wi-Fi Junction Box Antenna with 8 RPSMA male connectors is concealed within a standard four-gang electrical box, and is designed to operate with any manufacturer's 8-lead access points. The antenna's cover plate looks like a standard junction box cover, providing building managers, IT network operators, and building architects with an aesthetically appealing Wi-Fi antenna that will blend into existing room décor for "out of sight" coverage and capacity. The antenna is designed to be installed within a dry wall cut-out or drop ceiling tile where the 6 ft. leads can connect to a nearby access point.
